

REMARKS

Reference symbols V_{BEH} and V_{CEL} in Fig. 4 respectively represent values achieved by the curves representing erasure body voltage V_{BE} and erasure control voltage V_{CE} .

Applicant's Attorney has requested that the lead lines for these two reference symbols be changed to arrows in order to distinguish these value reference symbols from the reference symbols identifying the V_{BE} and V_{CE} curves in Fig. 4. Applicant's Attorney has also requested that reference symbol " V_{DD} " be appropriately added along the vertical axis in Fig. 4 at a location between the V_{BEH} and V_{SS} levels for the curve representing body-line voltage V_{BL} in order to make it clear that voltage V_{BL} varies across a range extending through V_{DD} and thus has a greater range than erasure body voltage V_{BE} illustrated earlier in Fig. 4.

Please telephone Attorney for Applicant(s) at 650-964-9767 if there are any questions.
